

For Immediate Release

InSolution KoolDuct Approved for Regal-Beloit Facility Installation

Indianapolis, IN – Regal-Beloit Corporation is a leading manufacturer of electric motors, mechanical and electrical motion controls and power generation products serving markets throughout the world. Regal is headquartered in Beloit, Wisconsin, and has manufacturing, sales and service facilities throughout the United States, Canada, Mexico, Europe and Asia.

Regal-Beloit is opening its newest 376,000 square foot facility in AllPoints Midwest industrial park in Plainfield, IN - a Browning/Duke Realty. Duke Realty Corporation owns and operates approximately 139 million rentable square feet of industrial, office and medical office locations, in 18 major U.S. cities. Regal-Beloit chose InSolution to fabricate KoolDuct to be installed in their facility for the HVAC.

KoolDuct is a revolutionary new type of ducting system that is the most advanced innovative system of pre-insulated air distribution ductwork available. Some features of KoolDuct include, closed cell, anti-microbial, 50%-85% lighter than sheet metal, 7/8" panel thickness R Value of 6.0, 1 3/16" panel thickness R Value of 8.1, only UL 181 listed foam based duct system worldwide, ASHRAE 90.1 compliant, meets all SMACNA design standards, LEED eligible, easily cleanable and paintable, life of warranty of building and 10 year outdoor product warranty. KoolDuct is a proven, cutting-edge technology that includes easy installation and maintenance, providing a new perspective in the field of air distribution.

Regal-Beloit will save on utility costs by installing KoolDuct into their facility. The pristine air quality by KoolDuct allows the least amount of allergens to leak into the System, therefore healthier employees, more productivity and fewer absent days. These factors, along with the outstanding reputation of KoolDuct are why Regal-Beloit is confident with installing InSolution's products into their facility. This project is in the design phase currently and is expected to be finalized by fall 2012; once completed, it will meet LEED Silver standards.
